

## OUR EXPECTATIONS OF PARENTS

1. A child must be well when returning to school. (A child will be put back on the local school district's bus and returned home if he or she arrives at GAB with a fever or illness.)
2. Parents will inform us of any illnesses a child may have had at home.
3. Parents will provide and keep routine medications at school, please count or measure to make sure there will be enough until the next home visit. If a child runs out of a required medication, one that cannot be missed, the parents will be expected to bring a refill to school or they will be required to come get the student.
4. Parents will meet with us on registration day each fall to discuss medications, special problems and illnesses during the summer.
5. Parents will submit the required annual Physical Examination Form each fall. This is to be completed and signed by a family physician.
6. Immunizations Certificates will be kept up-to-date. The Health Department regulations state that students cannot stay at school if this certificate is not current and updated.
7. Parents will take care of their children's eye glasses except in emergency type situations.
8. Parents will take their children home if they have anything contagious.
9. Parents will give us a copy of the student's insurance cards.
10. All medications must be purchased at home by the parent or guardian. Parents or guardian should always be responsible for knowing when a child will need refills. Please do not send a doctor's prescription for GAB personnel to fill. This is your responsibility. Please remember to make a copy of the prescription for us before filling.
